

# Live Virtual Learning Aligned to Your Bell Schedule

## Keep Students in the Building with Enhanced Virtual Learning

Whether staffing shortages have created class overload, gaps in availability of certified teachers, or scheduling challenges, Edmentum can help. Access customized virtual instruction when you need it and how you need it, delivered by Edmentum's state-certified virtual teachers using our award-winning digital curricula and the support of your own district staff.

Keep students in the building with a state-certified virtual teacher of record delivering **live instruction** according to your district schedule.

With Enhanced Virtual Learning, you can create your own recipe for live, synchronous virtual instruction across a building or an entire district.

- Consistent virtual teacher who leads all instruction for a given course
- Scheduling within your instructional day based on your district bell schedule
- Scheduling 1-5x per week, with 4-5 recommended sessions per week
- Instruction delivery for classes of 15-30 students per session

# Bringing High-Quality Virtual Learning Directly to You

State-Certified  
Educators  
Become an  
Extension of Your  
District Team

High-Quality  
Instructional  
Practice &  
Pedagogy

Standards-  
Aligned Learning  
Technology

## Educators to Extend Your District Team

- Familiar, consistent educators prioritize relationships, building rapport and trust with students as they learn.
- Virtual educators partner with district staff and communicate with students via email, phone calls, messaging, and Zoom.

## High-Quality Instructional Practice & Pedagogy

- Educators support active participation and peer collaboration, clarify key concepts, and support academic progress with just-in-time feedback.
- Our teachers receive ongoing development following a research-based teacher supervision and evaluation model.

## Standards-Aligned Learning Technology

- Learning is built on a foundation of award-winning digital curricula aligned to your state standards.
- Students activate learning through engaging tutorials, demonstrate mastery through embedded assessments, and get real-time insights into pacing and progress.
